I record to the the land with all and the ιh public, by inserting the following in your W paper. to SQUIRREL HUNT. bu On Monday laft, a number of the young le men of this town affembled for the purpole ot of amusing themselves by shooting the 00 Squirrels, which are uncommonly nume-CO rous this spring, in our fields and in the T adjacent woods. Finding, however that m their numbers were very madequate to the is destruction of any considerable proportion to of this formidable enemy of our corn fields. al they entered into a resolution to allemble fa again on Wednelday, to form themlelves at into parties, and to make a general effort for the extermination of the common te enemy. W Accordingly on Wednesday morning, W about twenty of our sharp shooters appeared on the parade, properly armed and e. be quipped for the contest : and placing fe themselves under the command of Captre tains Canfield and Putman, marched fur the CO field of action. A heavy firing was heard рı upon the adjacent hills during the greatest by part of the day; and it was not until a th late hour in the atternoon, that our invinać cibles returned from the scene of action. T bringing with them the scalps of 1663 of ti their fallen foes. to Captains Canfield and Putman, and p Lieut's. Hinsdill and A. Canfield, par-Ce ucularly distinguished themselves-tor lu which they have received the thanks of CE the neighborhood. The number of squirbe rels killed on Monday added to those killed CC on Wednelday, amount to 2163. Calcude lating that this number does not exceed Pela one fifth of the whole number of this animal which intest our field, -and supposing th that each fquirrel confumes or destroys ŵ ewo quarts of grain annually-it will be dι found, that the quantity destroyed in the di courte of the year, will amount to 675 tr bushels and 30 quarts. Then calculating CU that this Town has been settled 30 years, 110 and that the annual destruction of grain ex during that time has not been over rated ye in the above flatement, it will be feen, that de 20,882 bushels, and 26 quarts of wheat, E rye and corn, have been confumed by this T little animal, fince the first settlement of P the Town; which at the prices produce U3 now bears would be worth 17,402 dollars, 01 and 97 cents. ti Arlington, May 15th, 1807.
